Overview

Globally and in widely diverse business sectors, Myron works collaboratively with numerous clients transforming their businesses by leveraging Lean principles throughout the value chain to generate cash, reduce cost and improve quality and customer delivery.

Myron has held several senior level positions in Operations Management in ventures ranging from Greenfield start up and turnaround businesses to Fortune 100 companies.

Technical Capabilities

Lean Expert

Comprehensive Lean background, knowledge and experience in facility, operations and process design and transformation. Myron has vast experience as a professional educator of Lean tools and techniques ranging from introduction to advanced level facility design. He has provided training and education at all levels from the shop floor through to executive management.

Process Design Specialist

Through the culmination of his diverse industrial management and consulting experiences, Myron has developed an expertise from high level end to end Value Stream analysis down to individual process level design. His knowledge and skilled application of proven Lean tools consistently, predictably and repeatedly yield high performing processes, with the highest levels of quality using minimal Working Capital.
